

Oracle Transportation Management (OTM) Cloud Health Check

Oracle Transportation Management (OTM) Cloud Health Check

While organizations typically have continuous improvement programs in place to optimize and refine business processes, it's common to implement business software and then just let it run. To realize the full potential of Oracle Transportation Management, continuous improvement is key. Our Health Check program is designed to kick start an improvement program, relying on our years of expertise in logistics and Oracle Cloud OTM combined with industry best practice. Health Check engagements are intended to realize the full value of the Oracle Cloud OTM platform by engaging the business users on their terms and providing meaningful improvements at every level of the organization.

Key Health Check Activities & Deliverables

01

Getting Started

- **Preliminary systems assessment:** Evaluate current configuration of Oracle Cloud OTM prior to on-site meeting
- **Onsite Meeting:** Participate in a meeting with key stakeholders with an emphasis on any challenges the customer is currently experiencing

03

ID Challenges and Opportunities

- **Opportunities:** Strong focus on identifying, categorizing and prioritizing opportunities based on business value and effort
- **Constraint Analysis:** Incorporate dependencies and constraints in assessment of opportunities to identify key challenges as blockers to optimization

02

The Details

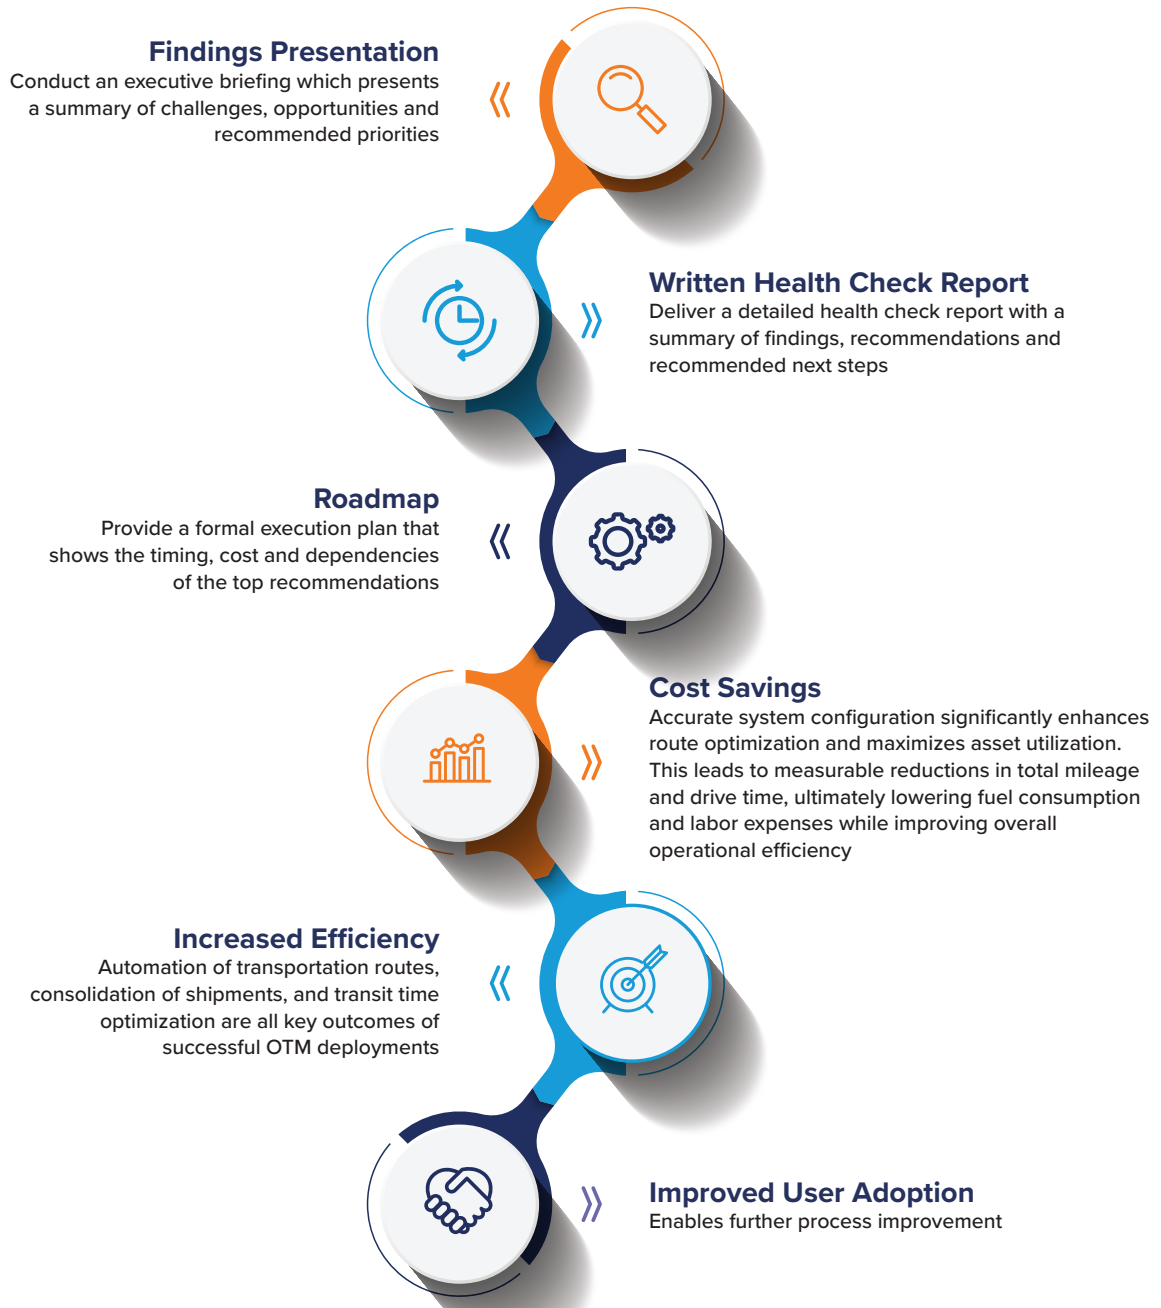

- **Process Workshops:** Review customer business processes with an emphasis on challenges
- **Gap Analysis:** Assess business processes and business challenges against Oracle Cloud OTM functionality and transportation best practices

04

Roadmap Readout

- **Priorities:** Roadmap recommendations are weighted by both their required effort and potential business impact, key dependencies are identified
- **Timing and Cost:** High priority and/or low effort items are presented on a timeline with expected costs. Items are prioritized based on tactical planning vs. strategic planning
