

# AI Services for Oracle Logistics Workspace

Unlock the full potential of AI in your supply chain operations

## The Challenge

While Oracle delivers cutting-edge AI innovations in every quarterly release, many organizations struggle to harness these capabilities effectively. The barriers include understanding out-of-the-box AI solutions, identifying automation opportunities, mastering Oracle's AI Agent framework, and building custom solutions to address unique business needs.

## Our Solution

Intellinum's AI Services bridge the gap between Oracle's AI capabilities and your business outcomes. We provide end-to-end consulting and advisory services to help you adopt, leverage, and maximize value from AI across your Oracle Logistics workspace.

## Comprehensive AI Services

Strategic assessment & roadmap:

- **Analyze** current business processes and pain points
- **Evaluate** Oracle's existing AI solutions and roadmap
- **Identify** labor-intensive activities for AI automation
- **Map gaps** between available solutions and specific needs

Custom AI development & deployment:

- **Design** and build AI agents using Oracle's framework
- **Develop** solutions for identified gaps and unique requirements
- **Implement** human-in-the-loop controls for governance
- **Deploy** scalable, cost-effective AI solutions

## Coverage

- ✓ Oracle Cloud WMS
- ✓ Oracle Cloud OTM
- ✓ Oracle Cloud GTM
- ✓ Oracle Cloud Advanced Inventory

# Business Benefits

## Operational excellence:

- Automate repetitive manual tasks
- Free workforce for strategic activities
- Reduce costs and processing time

## Intelligent decision-making:

- Generate actionable insights from data
- Enable proactive decision-making
- Improve accuracy and reduce errors

## Measurable ROI:

- Maximize Oracle Cloud investment
- Faster time-to-value from innovations
- Favorable cost propositions

## Who should partner with us?

Our services are designed for organizations that are:

- Currently** using Oracle Cloud Applications for logistics management
- Planning** to transition to modern Oracle Cloud application footprint
- Ready** to unlock AI-driven competitive advantages in their supply chain

## The Intellinum Advantage

### 1. Deep logistics expertise

Extensive knowledge of logistics processes, business needs, and Oracle Cloud solutions across WMS, OTM, GTM, and Advanced Inventory.

### 2. Ground-level engagement

Our team works directly with floor workers, supervisors, and executives to identify real use cases and solve actual operational challenges.

### 3. Proven AI implementation

Hands-on expertise in leveraging and extending Oracle's AI agentic framework to develop practical, business-focused solutions.

### 4. End-to-end partnership

From strategic planning to deployment and beyond, we partner with you throughout your AI transformation journey.
